The Energy and Resources Institute grew to be an institute of prominence under the leadership of renowned industrialist Mr Darbari Seth and visionary institution builder Dr Rajendra Kumar Pachauri. To pay a tribute and to celebrate the lives of TERI's founders, TERI organizes annual Founders' day each year in August.

### ***About Darbari Seth Memorial Lecture***

The annual lecture series was initiated by The Energy and Resources Institute (TERI) in 2002 in the memory of the institute's visionary founder and noted technocrat-industrialist, Darbari S Seth. Apart from being the Chairman of Tata Chemicals, at some stage, he was the Chairman of 14 companies. Ever ready for utilizing a share of the profits of companies that he led for larger social purposes, Mr Seth provided a decent sum from two companies he chaired for establishing TERI's corpus. His style of working as the Chairman of TERI was to provide encouragement, inspiration, and moral support to the Director and staff of the Institute without ever interfering with the operational decision-making.

### ***About Rajendra Kumar Pachauri Remembrance Event***

The annual remembrance series will be initiated by TERI in 2022 in the memory of Dr Rajendra Kumar Pachauri who was a visionary institution builder and the First Director General of TERI. If Mr Darbari Seth was the Founder of TERI, Dr Pachauri was the Builder of TERI. Under the leadership of Dr Pachauri, TERI's portfolio expanded as an independent research institute through the establishment of various centres and research areas. From being a fledgling, TERI shifted to its own office in the India Habitat Centre and opened a campus in Gwal Pahari and other locations. He transformed TERI to being a leading international voice on climate change and sustainable development with an interdisciplinary approach.
