- All others who are interested in knowing the sustainable approaches

Are you Rain Ready ?

Do you know;

- **Timely waterproofing your building is a GREEN feature?**
- **What is appropriate waterproofing and why is it needed?**
- **What are the reasons for leakages in buildings?**
- **What are the best practices of waterproofing in the industry?**
- **There are economical & efficient products and techniques available in the market and how can we easily find them?**
- **Waterproofing can improve the overall health of our building as well as the dwellers?**

If you too have these queries in your mind and are looking for the right answers, then we are glad to inform you that Eco-city forum is organizing an event on Waterproofing to address these questions and develop a dialogue amongst all the participants. Please register for **FREE** to make your building Water Proof.

First event under the series “Eco-city forum for Green Buildings & Materials”
The forum is formed under the Eco-city project which is a joint initiative by TERI and NMMC

The event is free and open for all
