

TERI Press launches title by MNRE Advisor: Multiple Choice Questions on Environmental Studies

New Delhi, 2 September 2016: TERI Press, the publishing arm of The Energy and Resources Institute, today launched a book on environmental studies authored by Dr Arun K Tripathi, Advisor in the Ministry of New and Renewable Energy, Government of India. The new title, ***Multiple Choice Questions on Environmental Studies***, highlights various environment-related topics, such as ecology and environment, biodiversity, natural resources, ecomarketing, environmental finance, air pollution, and water pollution. It also provides multiple choice questions on environmental studies in a concise and comprehensible manner, relevant for all age groups.

At the launch ceremony of his title, **Dr Tripathi** remarked, "This book attempts to present the environment subject in a simple and precise manner for students, aspirants of various competitive exams, and even laymen. In fact, the concept of environment is meant more for lifelong learning than for studying it just as a subject. With 17 chapters and over 1000 multiple choice questions, I have attempted to cover the subject of environment to the extent possible."

Ms Anupama Jauhry, Head, TERI Press said, "Environment education is not preaching the current generation about various ecological facts but about actually changing their mode of thinking by making them understand that they can undo the past mistakes by their proactive actions. We have to bring about a holistic change to the way the youngsters look at environment - not as an academic topic but as part of life".

The book will be re-launched at the ongoing Delhi Book Fair in Pragati Maidan on 3 September, 11:30 am.

About the Author

Dr Arun K Tripathi has a degree in Agricultural Engineering. He is an M. Tech from IIT Kharagpur. He did his PhD in Biomass Energy from IIT Delhi. He is also an MBA in Environmental Management. He has over three decades of experience in planning, development, and implementation of various renewable energy programmes, particularly on biogas development, biomass gasification, solar rooftops, waste-to-energy, village energy security, solar cities, green buildings, and information and public awareness in the country.

About TERI

The Energy and Resources Institute is an independent, not-for-profit research institute focused on energy, environment, and sustainable development and devoted to efficient and sustainable use of natural resources. Since its inception in 1974, TERI has emerged as an institution of

excellence for its path-breaking research, and is a global brand widely respected by political leaders, policy makers, corporate entities as well as the civil society at large.
